

PUJA MIDDE

Applied AI Engineer | Software Engineer

(+91) 9121290915 | middepuja1005@gmail.com | linkedin.com/in/puja-midde3 | github.com/pujareddy2 | pujaportfolio-m.vercel.app

PROFILE SUMMARY

Applied AI / ML Engineer and third-year Computer Science student with hands-on experience building Machine Learning and Generative AI applications using Python, FastAPI, OpenAI API, and Gemini API. Experienced in model training, feature engineering, data preprocessing, model evaluation, prompt engineering, API integration, REST API development, and data analysis. Delivered AI, ML, analytics, and full-stack solutions through internships, hackathons, and project-based development.

EDUCATION

Bachelor of Engineering in Computer Science

CGPA: 8.6/10

Stanley College of Engineering & Technology for Women, Hyderabad

Expected Graduation: 2027

TECHNICAL SKILLS

Programming:	Python, Java, SQL, JavaScript, C
Core CS:	Data Structures & Algorithms, Operating Systems, Computer Networks, DBMS, OOP
Machine Learning:	Scikit-learn, Feature Engineering, Model Training & Evaluation, Classification, Clustering
Generative AI & NLP:	OpenAI API, Gemini API, Prompt Engineering, NLP, Tokenization, Embeddings
Backend Development:	FastAPI, REST APIs, API Integration
Data Analysis & Visualization:	Pandas, NumPy, Matplotlib, Seaborn, Power BI
Databases:	MySQL, PostgreSQL
Frontend Development:	React.js, HTML, CSS
Tools:	Git, GitHub, Linux, Jupyter Notebook, Streamlit

INTERNSHIPS & EXPERIENCE

AI & Workflow Automation Intern – Alonzo AI

May 2026 – June 2026

Built backend services using FastAPI, PostgreSQL, SQLAlchemy, and REST APIs for workflow automation. Developed role-based access control, assignment systems, approval pipelines, email notifications, and dashboard integrations. Engineered scalable database models and operational workflows for audit, notice, and client management systems.

Machine Learning Research Intern – DRDO Cybersecurity

Feb 2026 – Apr 2026

Engineered an ML-based intrusion detection pipeline; trained and optimized 5+ models (SVM, Random Forest, XGBoost) using cross-validation and feature engineering, improving detection accuracy by 18% over baseline.

AI Developer Intern – Viswam.AI (Swecha & IIIT Hyderabad)

May 2025 – Jun 2025

Designed, developed, and deployed a RAG-based LLM chatbot using LangChain, Hugging Face Transformers, and Streamlit; processed 80+ Telugu language datasets, achieving 35% improvement in response relevance through iterative prompt engineering and retrieval optimization.

AI Intern – Microsoft / Edunet / AICTE

2025

Built and evaluated Machine Learning, Deep Learning, and Generative AI solutions using Microsoft Azure AI services; implemented end-to-end AI workflows with PyTorch, covering training, inference, evaluation, and deployment.

ML & Data Research Intern – Lunabers Space Tech

Feb 2026 – Jun 2026

Conducted ML-oriented feasibility research on lunar resource extraction; ranked 10+ high-value extraterrestrial materials by demand, rarity, and extraction viability. Structured large-scale research data into actionable insights and delivered technical reports supporting resource prioritization and AI-driven mission planning.

AI & Data Analytics Intern – Edunet Foundation (AICTE & Shell)

Feb 2025 – Mar 2025

Automated Power BI dashboards using DAX; modeled and visualized supply chain APIs across 10+ metrics, reducing reporting cycle time by 30%.

Web Development Intern – ApexPlanet Software Pvt. Ltd.

Apr 2025 – May 2025

Built React-based CRUD applications with REST API integration and state management; reduced data-fetch latency by 20% through optimized API call handling.

PROJECTS

Legal Guardian AI — GenAI Legal Analysis System

Live | GitHub

Built and deployed an AI-powered legal analysis platform using FastAPI, LangChain, Gemini API, and Google Document AI; implemented document processing, legal clause extraction, RAG-based retrieval, LLM-powered summarization, reducing manual review effort by 60%.

AyuCare — AI Health Assistant (AIHackDays 2025 Runner-Up)

Live | GitHub

Developed an AI healthcare assistant using FastAPI, OpenAI API, and PyTorch; integrated plant image classification achieving 87% accuracy and AI-powered health guidance, securing Runner-Up position among 100+ participating teams.

RepoIntel — AI GitHub Repository Intelligence Tool

GitHub

Developed an AI-powered GitHub repository analysis platform using GitHub APIs and AI-powered scoring mechanisms; processed and evaluated 50+ repositories to generate structured technical insights and automated repository summaries.

Airbnb Price Prediction — ML Pipeline

GitHub

Built an end-to-end machine learning pipeline using feature engineering, clustering (KMeans, DBSCAN, GMM), and XGBoost regression; improved price prediction R^2 score by 22% compared to baseline models.

AI Notion Assistant — LLM Automation Tool

Live | GitHub

Automated document workflows using LangChain, OpenAI API, and Notion API; reduced manual content structuring effort by 70% for repetitive task generation.

Smart Attendance System (SAAIS)

In Progress

Developing a multi-layer attendance system integrating QR authentication, GPS verification, image capture, and anomaly detection for attendance validation.

ProductHub — Full-Stack Product Management System

Live | GitHub

Deployed full-stack CRUD application using FastAPI, React, and PostgreSQL with CI/CD pipeline integration and production REST API backend.

CERTIFICATIONS

Oracle Cloud Infrastructure AI Foundations (Oracle, 2025) • Machine Learning with Python (IBM, 2024) • Deloitte Data Analytics Job Simulation (2025) • AI Internship Certification (Microsoft–Edunet–AICTE, 2025)

ACHIEVEMENTS

Runner-Up – AIHack Days 2025 • 3rd Place – Infinity 2K25 Hackathon • Top Performer – Flipkart GRiD Engineering Challenge • State Rank 1 – Intermediate Board Examinations (2022) • Winner – State-Level Literary Competitions (3×)
